Summary

Final-year **BE Computer Science Engineering (IoT)** student with hands-on experience in AI- and IoT-based projects, including predictive industrial safety systems and real-time monitoring applications. Skilled in Python, IoT sensors, embedded systems, and data analysis, with a strong interest in applying technology to solve real-world problems. Actively seeking an entry-level role to grow as a software or IoT engineer.

Project - 1

Webcam-based Eye Blink Analysis for Screen-induced Strain

- Processed live webcam video using Python and OpenCV for face and eye detection.
- Implemented Eye Aspect Ratio (EAR) calculations to detect blink events in real time.
- Analysed blink frequency trends to identify prolonged screen usage and eye fatigue.
- Achieved stable real-time performance on standard laptop hardware.

Project -2

Real-Time Industrial Safety Monitoring System

- Integrated gas, temperature, vibration, and flame sensors for continuous monitoring.
- Analysed sensor data using Python-based logic to detect unsafe conditions.
- Generated automated alerts when safety thresholds were crossed.
- Improved early hazard detection through continuous data evaluation.

Education

B.E Computer Science and Engineering (Internet Of Things), 2002 – 2026
Saveetha Engineering College Chennai
CGPA - 7.5
HSC - 72 %
SSLC - 84%

Skills

Technical : SQL , Java , Python , C

Non Technical : Teamwork & Collaboration , Problem-Solving Ability , Time Management , Adaptability , Quick Learner.

Internship

Machine Learning : Gradtwin **(FEB - MAY 2026)**

Worked on Practical AI and ML Concept and Real Time Problem Solving.
Gained hand on Experience in data analysis and model development.

Certifications

Course era

Introduction To Programming With Matlab
Data Science Fundmentals With Python & SQL
GPU Programming
